Aso and Kartak = Sharad or Autumn. In general there are three seasons in India which are winter, summer and monsoon. This is because in Gujarati Calendar the days are calculated using the difference of the longitudinal angle between the position of the sun and moon. This means if as per Christian calendar it is year 2015, in Gujarati calendar it would be considered as 2015+56=2071st year. To download the calendar (1) Press right click of your mouse over the image of the page, (2) Select 'Save Image As' option, (3) Click over your selection. In Panchang day starts and ends with sunrise. It begins with Gujarati month of Kartak followed by Magshar, Posh, Maha, Fagan, Chaitra, Vaishakh, Jeth, Ashadh, Shravan, Bhadarvo and Aaso. Your suggestions are welcome. However there are sub seasons too in each season. Some Gujaratis related affairs are added in relevant date boxes of our Gujarati calendar 2019. All the other months pages will be released soon. As per the Gujarati calendar, the months of Chaitra and Vaishakh are considered as Vasant or Spring, Magshar and Posh mean Hemant or pre-winter and Maha and Fagan mean Shishir or Winter. Not only this but sometimes a titi is omitted or sometime two continuous days share the same titi. In Gujarati Hindu Vikram Samvat Calendar seasons are as per the sun, months as per the moon and days as per both the sun and the moon. The Vikrama Samvat lunar calendar was founded by the emperor Vikramaditya of Ujjain following his victory over the Shakas in 56 BCE. All together a lunar year of 354 days 8 hours 48 minutes and 36 seconds. Gujarati Vikram Samvat Calendar is around 56-year ahead of Christian calendar. Difference between Gujarati Vikram Samvat year and northern Indian Vikram Samvat calendar year is that while Gujarati Calendar year of Vikram Samvat begins with the first day after the new moon in the month of Chaitra (usually in March/April in Christian calendar). In our endeavor to cater the best that Gujaratis across the world need, we are launching Gujarati Calendar consequently for second year. Similary Jeth and Ashadh are the months of Krishna or Summer. They are Vasant(spring), Grishma(summer), Varsha(monsoon), Sharad(autumn), Hemant(pre-winter) and Shishir(winter). (To calculate the present Christian year, 57 years should be subtracted from the Indian year if the date is between starting of the Indian year and the end of the Western year i.e. between Kartak sud 1 and 31 December. They are respectively called Shyaalo, Unaalo and Chomauso in Gujarati language. On the other hand in Nepal where Vikram Samvat is official calendar the new year begins in the middle of April. To make it as a desktop wallpaper, (1)Press right click of your mouse over the image, (2) Select 'Set as Desktop background', (3) Click over your selection. Shravana and Bhadarvo = Varsha or Monsoon. To fix the lunar months into the solar year( because 60 solar months = 62 lunar months) there is a practice of adding an extra month which is called Adhik Mahino or Purushottam maas at interval of 30 months or say two and half years. Gujarati calendar begins a day after Diwali. While Christian calendar is very much in practice at job/business/professional fronts, when it comes to spirituality or faith, when it comes to fairs and festivals, when it comes to identify auspicious days and holy schedules, Gujarati calendar is followed. Gujarati Calendar 2019: Instruction of usage Currently we are releasing only October 2017-August 2018 calendar pages. If the date falls between the beginning of the Western year and the end of the Indian year i.e. between 1 January and Aso vad 30, then only 56 years should be subtracted.) Gujarati Vikram Samvat calendar uses a solar year but divides it into 12 lunar months, each consisting 29 days 12 hours 44 minutes and 3 seconds. DeshGujarat Days in Gujarati calendar are pronounced like this: Monday = Somvar, Tuesday = Mangalvaar, Wednesday = Budhvaar, Thursday = Guruvaar, Friday = Shukravaar, Saturday = Shanivaar and Sunday = Raviavaar.
